i gave up after like 5 days because i couldn't concentrate on anything with a splitting headache, and it was almost finals time

but every medical decision is potentially complex, and they should not be made lightly, especially in pregnancy, given the potential to affect both the mother and the developing child.

it is a big mistake to assume that any one factor is a cause of sleep apnea (or any other disorder for that matter)

the activity of 6-8-gingerols as vr1 agonists, combined with their lesserpungency, makes them prospective lead compounds in the development of a new class of antinociceptive agents.(sl-106).

10 issue, will look at the possibility of rationing health care, including the state of oregon's experience with drafting and implementing a health care plan that includes rationing.
