you may have a pressure dressing applied to the top of your leg to reduce the risk of any bleeding from the
vein which the catheters were placed in at the beginning of your procedure

weakness. Wernicke's encephalopathy often reversible caused by thiamine deficiency manifests as nystagmus

and if no one ever mentioned that Todd guy, who was he to question it? maybe nothing had happened at all,
and they were trying to keep it quiet to keep sucking the government teet a while longer

irish moss (not a true moss, but the dried leaf-like parts of a northern seaweed): use to attract money and luck,
and for protection
